

Happy Spring Countryside Residents,

It's great to see the days getting warmer! Of course with the warmth, also comes the danger for fires. With our forest interface, we want to make sure there is ample clearance between dry fuels to prevent the spread of fire on our properties. Now is the time to remove dead trees and brush. The City has a program that will reimburse home owners for part of the cost of removing and thinning their properties. The application and info is on the Countryside Homeowner's website along with a list of contractors. More information can also be obtained from the following RCFD contact;

Tim Weaver  
Lieutenant, Rapid City Fire Department  
Wildfire Mitigation
